11 February 2024

All responses by email to: [procurement@gavi.org](mailto:procurement@gavi.org)

*(submissions are due before midnight Geneva Time on the Closing Date)*

#### **1. Background and Introduction**

Gavi Alliance's ("**Gavi**") mission is to save children's lives and protect people's health by increasing access to immunisation in poor countries.

Gavi is a unique organisation that aligns public and private resources in a global effort to create greater access to the benefits of immunisation. It does this with precision and in creative, innovative ways to ensure that donor contributions efficiently save lives and help build self-sufficiency in the world's poorest communities and regions.

For more information, please visit the Gavi website: <http://www.gavi.org/about/mission>

#### **2. Background of the team and purpose of the role**

Gavi Country Programmes Delivery (CPD) - Nigeria Country Team (CT) has identified the need for a temporary and embedded consultant to support the National Primary Health Care Development Agency (NPHCDA) to effectively plan and implement vaccine campaigns with a focus on campaign effectiveness and integration. Gavi supports the NPHCDA through financial and technical mechanisms to implement strategies to introduce and scale up use of vaccines in Nigeria.

The Supplementary Immunisation Activities consultant is expected to support NPHCDA under leadership of the Director, Disease Control and Immunisation to plan for, implement, monitor/supervise, and document prioritised vaccine programme activities in Nigeria including Big Catch-Up campaign, polio and non-polio supplementary immunisation activities (NPSIA), and introduction of Malaria and HPV vaccines with a focus on integration, cross learning, and institutional capacity building. The consultant should monitor progress towards country targets for supplementary immunisation activities and advise NPHCDA and partners on related technical and programmatic components to improve performance.
